

A LITTLE BIT *OF* FLASH

AND A *WHOLE* LOT *OF* FLEX

The new Rhino® 2150 Flex-Wing is 15' of safety and innovation.

The Rhino 2150 takes safety to new heights by making the LED lighting system on the back, which meets or exceeds all safety standards for slow-moving implements, a standard feature.

The 2150 Flex-Wing also offers a smooth top and bottom deck design with dual-cut chambers and a 2 1/2" cutting capacity. Its new, improved tongue design features a standard clevis, while the Infinity cast carrier houses 1/2" x 4" parallel lift heavy-duty blades with 9" cutting edges.
