6	41560	251472	251472	TOOTH	7 - 7 - 8 - 9
7	41561	SML41561DS	SML41561DS	SHANK, Tooth (Replacement)	as required

* Not sold as repair part.

NOTE: NOT COMPATIBLE WITH BOLT ON REVERSIBLE BLADE.

Tooth bar can be assembled using tools ordinarily available.

ASSEMBLING TOOTH BAR

1. Position tooth bar over cutting edge of bucket. Using end plates as a guide, mark and drill one 11/16" hole in each side of bucket.

NOTE: Make sure tooth bar is seated against cutting edge of bucket before marking and drilling holes. Drill holes near rear of slot so tooth bar can be adjusted rearward as cutting edge of bucket wears.

2. Fasten tooth bar to bucket using 5/8 x 1-1/2 carriage bolts (2), 5/8 lock washers (3) and 5/8 nuts (4).
